Meeting Approves Community Center

A good representation of residents of the Carbon community Monday evening voted in favor of building a Community Center in Carbon. The decision to go ahead with the project was unanimous and not one dissenting vote was heard.

Mr. Dwight Graff was acting chairman and introduced Mr. N. F. Bell, district agriculturist, who spoke on difficulties encountered by other districts in building community centers. He stressed the fact that a community spirit is essential for the success of such projects and that all individuals and organizations should strive for a common ground on which to base their work in achieving success.

The new organization will officially be known as the Carbon Community Club. The meeting approved of and authorized the temporary officers to continue in their present capacities. These officers are: D. Graff, pres.; G.W. Schell, vice-pres.; S.F. Torrance, treasurer; Mrs. R. Mortimer, secretary. The acting Community Council was also approved and will remain in office for a period of one year. Members of the council are: S. Cannings, S. Garrett, G.E. Schell, L. Brown, V.J. Dresser, B. Charlebois, Ed Ohlhauser, L. Halstead, H.J. Gimbel, S. Hay, T. Schmidt, F. Poxon, J. Barber, D. Graff, R. Snell, I. McCracken, Merle Anderson, Adam Buyer, J. A. Ohlhauser, W.D. MacDonald, R. Garrett, S.F. Torrance, Mrs. R. Mortimer, Mrs. J.A. Barr. The council has power to add lady members as desired.

Approximate costs of the three units were presented to the meeting. Reasons were given for

Mrs. C. Pattison Buried Thursday

Funeral services for Mrs. Charles (Mattie Florence) Pattison, 48, of Carbon, who died Monday, March 13 in the Royal Alexander hospital, Edmonton, were held from Carbon United Church on Thursday, March 16, at 2 p.m. Rev. Cyril A. Warren officiated and burial was in Carbon cemetery, with Jacques funeral home in charge of arrangements. Pallbearers were Hugh Brown, Edmonton, Victor Hawkins, Drumheller, Sam Garrett, Richard Garrett, Archie McLeod and Fred Bessant.

Mrs. Pattison was born in Merlin, Ont., and moved to Didsbury in 1904. In 1905 she moved to Carbon and had lived here since. She was a member of the Ladies' Aid of Carbon United Church.

Besides her husband she is survived by a daughter, Violet Leona of Carbon; a son, Kenneth Donald of Lacombe; two sisters, Mrs. Fred Poffenroth and Mrs. Jack Shale, both of Calgary; and four brothers, William of Vancouver, Harvey of Drumheller, and Leonard and Leslie, both of Carbon.

Says Mercurys Are Good Ambassadors

EDMONTON.—Besides playing a pleasing and winning brand of hockey in overseas exhibitions leading up to the world amateur hockey championships, Edmonton Mercurys have established themselves as good Canadian ambassadors.

As proof, George (Edmonton Journal) MacKintosh incorporates in his column some excerpts from James A. MacKinnon. Said the Senator:

"The consensus of the Swiss press is that this is without doubt the best Canadian team which has played on the European continent. Without extending themselves, the Mercurys have had no difficulty in beating their opponents.

"One fact in particular is worthy of mention. Last year a Canadian team (Sudbury Wolves) was booed in many matches because of their roughness and the press comments were very unfavorable. The U.S. team also earned a bad reputation for using the same heavy bodychecking tactics. The result was that both Canada and the U.S. did harm to the game and gave their countries a bad name.

"Mercurys have erased that unfavorable impression by their sportsmanlike attitude and by doing their best to avoid giving rise to adverse comments or arousing hostility. They are a very fine group of fellows and have done a fine job."

Plan To Spend \$6,000,000 On Line

CALGARY.—Gordon H. Allen, Calgary solicitor, said recently that backers of coal-mining project in the Rocky Mountain foothills have informed him they hope to start work this year on building a 65-mile railroad from Calgary to the site, and on opening and equipping the project.

He quoted them as saying they would spend \$6,000,000 on the scheme.

Mr. Allen said in an interview he had recently consulted J. C. Lander-you, Social Credit Member for Lethbridge, who will ask the Alberta Legislature to allow the company, Ford Highwood Collieries, to proceed with operations.

In business ignorance is not bliss.

Received Merit Certificates

Eastern Irrigation District Farmers of Alberta received merit certificates from the Brooks Board of Trade, recently in recognition of the awards won for exhibits at the Toronto Royal Agricultural Winter Fair; the Chicago Hay and Grain Show; and the Calgary Seed Fair. Shown left to right (seated) are: Mrs. Gus Regehr; Mrs. Emma Inda; Wilson E. Cain, local M.L.A.; Hon. David Ure, Alberta Minister of Agriculture; and Mr. and Mrs. Eugene Laganier. Back row, left to right (standing) are: Toni Ohama, Dan Inda, Mrs. Toni Ohama, A. M. Wilson, field crops commissioner, Edmonton; Mr. and Mrs. Joe Tell, N. J. Ennis, Carl J. Anderson, E.I.D. manager; Gus Regehr, M. A. Valli, and John Martin, Brooks Board of Trade president.

Saskatchewan To Test Hybrid Corn

REGINA.—Possibility of introducing hybrid corn in certain areas of southwest Saskatchewan is now being studied by agricultural authorities in the province.

It is understood that the provincial field crops branch will likely distribute hybrid corn seed under its forage crops program for the first time this year.

Provided sufficient supplies will be available, this seed would be distributed at cost.

One strong feature of the hybrid corn is the fact that the seed can be well spaced and the plant grown on summerfallow land. In this way, the land could be utilized to grow a forage crop.

The plant could also be grown as an ordinary crop on land which is not being summerfallowed.

The hybrid corn seed is derived by crossing other corns. The seed produces a hardy plant which gives much more corn than other varieties. Yields have been increased greatly as a result of its use in the United States.

Tests have shown that the plant gives a fair yield even under dry conditions. In a very dry year, the hybrid corn may produce more forage than any other type of crop if it is properly handled and the weeds kept out. The chemical 2,4-D, is said to be of considerable assistance in controlling weed growth where the cornseed is sown.

The plant is recommended for use in areas where the elevation is not too high and the nights not too cold.

Honest Pup Returns Money To Bank

YORKTON, Sask. — Yorkton has an honest pup.

Customers in the Bank of Montreal gaped when Ricky a golden cocker-spaniel, trotted up to the tellers cage with a two-dollar roll of dimes. Thinking Ricky may have picked up the money from behind the counters, bank manager Charles McBride made a hurried check of the bank vault and his tellers. All was ship shape.

The mystery was solved minutes later when Bill Kerr, manager of the Yorkton curling rink, phoned to report losing a roll of dimes somewhere between the bank and his office. Ricky is owned by Angus Spice, another Yorkton businessman.

The roll of dimes was stamped "Bank of Montreal" but Ricky cannot read—or can he?

PLENTY OF WEIGHT

Thirty-two hundred pounds of curling rocks, valued at \$5,000, was used at the Macdonald Brier Tankard competition held at Vancouver.

Like the common cup, the common towel should be banished. Both are potential disease spreaders.

FUNNY And OTHERWISE

Black—"What did her father advise when you told him you loved his daughter, but only had a hundred dollars saved up?"

White—"He advised me to invest it all in a one-way railway ticket with no stop-overs!"

Vicar: "Ah, you have a son in Hollywood. Does he ever come home?"

Old Resident: "He's been home every summer for five years."

Vicar: "And did he bring his wife with him?"

Old Resident: "That he did, sir. And five smart girls they were."

"I doubt if your eyes are strong enough to get you a driver's license?" said the optician. "Sit here and tell me how many letters you can read on the number plate of that car outside."

"What car?" said the would-be motorist.

Then there was the case of the motorist who always went round curves marked "Danger" at top speed because he felt that the sooner he was out of the danger zone the better.

A woman seeking U.S. citizenship papers did all right with the examination until she came to a question about the flag. To the query, "What flies over the state house in Boston?" she replied: "Pigeons."

A revivalist said to his congregation:

"There is a man among us who is flirting with another man's wife. Unless he puts \$5 in the collection box, his name will be read from the pulpit."

When the collection box came in there were six \$5 bills in it, and one for \$2 with a note pinned to it, saying:

"This is all the cash I have, but will send the other \$3 on Wednesday."

Traffic Officer: "Hey! What's the idea? Didn't you hear me whistle to you?"

Girl Motorist: "Certainly I did, and if you try again I'll report you."

SELECTED RECIPES

BROILED HAMBURG STEAK ON ONION RINGS
1 pound finely chopped lean raw beef
1/4 cup ground suet
1 cup soft fine bread crumbs
7 strips bacon
7 slices Spanish Onion (1/2 inch thick)
1 tablespoon chopped parsley
3 tablespoons butter
2 tablespoons onion juice
1/2 teaspoon salt
1/2 teaspoon pepper
1 tablespoon water
Lay onion in buttered shallow baking dish. Pour over 2 tablespoons melted butter, sprinkle with salt and pepper, cover closely, bake until tender (about 30 minutes) in moderate oven (350 deg. F.).
Cook parsley in rest of butter and add to beef, suet crumbs, and seasonings. Mold into 7 flat cakes and wrap each with a slice of bacon. Place each on an onion slice in baking dish and cook in broiling oven 5 minutes on each side. Baste twice.

TWO NEW SCHOOLS
VERNON, B.C.—During the Easter holidays two new schools will be opened here—a six-room elementary school and a 22-room junior high school.

To Get More Locker Plants

WINNIPEG.—Another 20 quick-freeze locker plants will be built in Manitoba in 1950, to serve an additional 8,000 rural families, C. M. Fleming, Winnipeg, secretary of the Manitoba Quick Freeze Locker association, predicted. Probable cost will be \$500,000.

Mr. Fleming made this estimate at the association's fifth annual convention held here.

"Manitoba already has 100 quick-freeze locker plants representing an investment of \$2,500,000 and serving about 40,000 rural families," he stated.

Mr. Fleming foresaw the day when there would be mass production of "prepared meals" in quick-freeze plants in cities and towns.

If your child stutters, it means he's under too much nervous tension, making him lose control of the delicate muscular balance he needs for speech. In the early stage, you should do nothing directly about correcting his speech but concentrate your efforts in finding out what's making him so tense.

The job of finding out what's causing the nervous tension may be a difficult one, since the origin can be varied and far removed from the speech itself, the folder points out, and one of the first steps to be taken by the parent is to prevent the child from becoming anxious about his speech. "Remember that your anxiety is readily felt by him. If you're upset, or show pity, he'll react with more hesitation and stuttering."

"Parents can do a real job of helping to prevent or cure stuttering if they always keep in mind the close tie-up between the child's emotional stability and his speech habits," the folder states.

Woodlots Can Be Profitable

Most farm woodlots need what is called an improvement cutting in which comparatively useless species or malformed and dying trees are removed to make way for the growth of better species and more thrifty trees. The wood from this improvement cutting is usually neither large nor merchantable as logs; but on the local market it can generally be sold to advantage, if it is not all required for fuel.

The tops of both mature hardwood and softwood trees will yield a large amount of fuelwood which should be harvested when the logs are cut. At this time, any young or small trees broken or injured in felling the mature timber, should also be cut.

Stand improvement of the farm woodlot at the time of harvesting is a logical step in woodlot management. This need not be done all at once. When felling each mature tree, the stand for a good distance around should be culled to remove useless members of the stand. In time the whole woodlot will be in proper condition to encourage the greatest growth.

LONDON.—Mrs. Sarah Humphrey, 103, celebrated her birthday by ordering a pair of glasses. She said that she had a pair about 60 years ago but lost them. She still likes to knit and crochet.

Temperature is responsible for the size and form of snowflakes. If the temperature is low, the flakes are small, flat and regular; near freezing, flakes often mat together and form large clots; higher, flakes are often incomplete as parts are melted off.

A black and white portrait of a woman with dark hair, smiling and looking slightly to the left. She is wearing a headband adorned with white flowers and a dark, patterned garment. The image is framed by a thick black border.

A black and white photograph of a woman in a dark, high-collared dress with a wide belt and a full skirt, posing dramatically with one hand on her hip and the other near her face. She is wearing dark heels and has her hair styled in an updo with a flower.

A black and white photograph of a woman with dark hair, smiling and posing. She is wearing a dark, knee-length dress with a white collar and white cuffs. She is holding a small object in her hands. The background is a textured, light-colored wall.

The past 50 years have witnessed many great advances in medicine, but none more dramatic than the discovery that penicillin is truly a life-saver where cases of subacute bacterial endocarditis, a heart infection, are concerned, it is stated by the Canadian Heart Association. Until 1944, it was rare for a person suffering from this heart ailment to recover—now, it is just about as rare for one to die.

Then came penicillin, but for four years, 1940-1944, it acquired the reputation of being useless in this disease. It was then that one of Dr. Libman's pupils — Dr. Leo Loewe — who was working in the Brooklyn Jewish Hospital, announced results of further experiments with penicillin. He demonstrated that by giving larger amounts of penicillin the disease could be stopped.

"And it is very probable that the disease can be prevented," states the Canadian Heart Association release. "We know that people with rheumatic valvular disease who develop an apparently innocent infection such as an abscessed tooth which is extracted, or tonsillitis, may develop subacute bacterial endocarditis as a complication of this innocent infection. By giving penicillin in adequate amounts immediately before and after the tooth extraction, and by treating all acute infections by modern methods, we must certainly prevent the development of subacute bacterial endocarditis."

LONDON. — Rev. J. G. Wagoner told a group of prospective brides: "Most young people would insist on examining a new car by daylight. But when it comes to marriage many are content to examine the goods by moonlight."

Each of the 777,450 out-of-state automobiles which visited Oregon this year represented a revenue of \$113.39 for the state.

There are baby-sitters, dog-sitters and cat-sitters. But did you ever hear of a wife-sitter? You can credit it or otherwise, but there are men so engaged in Port Elizabeth, South Africa. The idea of a wife-sitter for a woman whose husband is working late, gone to the fights, to his club or is out of town was originated by one, Harry Knight, of Port Elizabeth. Mr. Knight is a scoutmaster. All the wife-sitters in Port Elizabeth are scoutmasters. They offer to sit up with a lonely wife until any hour. It would seem this should have a place near the top of the list of interesting occupations. Do you frequently find it necessary to leave your matrimonial mate alone at night? What do you think of engaging a wife-sitter for her? Are there any tall, dark and handsome bachelor scoutmasters in your neighborhood?

How can you tell if a woman really loves her husband? An interesting question. If you see a wife riding on the rear of a motorcycle operated by her husband, you can be certain she loves him. If a woman laughs at all her husband's jokes, she is undoubtedly deeply in love with him. If a wife frequently intersperses her conversation with the remark, "My husband says," it is a certain sign she has quite a spark of love burning for her spouse. There are a number of other signs which can be used for checking the extent of a wife's love. They will be reported in a forthcoming issue.

Eighty-one per cent. of women receive a proposal of marriage before they are 18. Most proposals of marriage are made around 10 p.m., next best hours for receiving proposals are in the order named: 11 p.m., midnight, 1 a.m., 2 a.m. Poorest hour for a girl to expect a proposal is 8 p.m.; or so it is indicated by extensive recent research on the subject. Incidentally, most proposals continue to be made in automobiles.

A 98-year oldster attributes his long life to adherence to the "four browns" diet, e.g., whole wheat bread, baked beans, brown eggs and brown sugar . . . When Edsel Ford was born, his father, Henry Ford, was a \$15-a-week mechanic working for the Detroit Edison Co.

What are the qualifications of a Class-A husband? That brilliant newspaperwoman, Baird Leonard, once stated the qualifications she deemed necessary in a Grade-A spouse. Some of these qualifications were: 1. He sleeps with his mouth closed. 2. After he takes his tub the bathroom always looks as if the watermain had burst. 3. He likes to wear evening clothes. 4. He likes all his wife's friends. 5. His private secretary is a man. 6. When he goes some place by himself he remembers what all the women present wore. 7. He never tells his wife's age. 287

(By Francis James)

It's a fairly large room, and quite bright, but it has no fireplace, so I have had two bookcases arranged in a focal grouping in the middle of one wall, with easy chairs beside them. I am tired of this arrangement and wonder if there isn't something else I could use for the focal point. Anyway I'm giving most of the room's furnishings to my daughter, who is being married, so you see I'm really starting anew. The only things I've retained are my rug, which is a claret-coloured wall-to-wall broadloom, our new radio-combination—a lovely big cabinet model—and a Duncan Phyfe sofa upholstered in cream satin. The walls at present are painted coral and I want to change them too.

Dear Mrs. Mac:
Why not use your new radio-com-
bination for the focal point? It's a
thing you'll be using a great deal,
as well as being beautiful, so I think
it's the logical piece to highlight.

I suggest you place your radio in the middle of one wall, and behind it, and extending to about three feet on either side of it, have a wallpaper mural with, say, a Victorian or Grecian design, if you want to strike a period note — otherwise perhaps a floral. Grev would be a suitable

background colour for such a mural, particularly if you choose a classic motif. For the remainder of that wall, and for the other three walls, how about a plain paper, or one with a very unobtrusive design, in an olive or dark green?

I think your radio will show up charmingly against the mural background. Suitable ornaments on top of it would be nice—something to add a bit of height—perhaps a pair of Moorcroft vases or a silver candelabra. Put a couple of comfortable chairs beside it and voila—you have a focal point that is functional as well as decorative.

In this connection I would like to mention that wallpaper can be put to ever so many uses in beautifying the home and high-lighting points of interest. Striking patterns can be used to frame doors and windows, if the latter are curtained in plain fabrics and the rest of the room's wallpaper is fairly subdued. A small niche back of an important piece of furniture may be lined with wallpaper with very good effect. Wallpaper fitted into the panels of a closet door adds quite a smart touch when it is of the design in the room that the door opens into. And the unique and lovely screen covers that may be made with wallpaper open a whole new field in imaginative decorating.

White pepper is simply well-ripened black pepper.

A political cartoon by 'figlio' depicting two men in military uniforms running. The man on the left carries a large bomb, and the man on the right carries a large shield. A speech bubble from the man with the bomb says "OH-OH-IF EITHER ONE SHOULD SLIP!!". A globe is shown falling in the background. The cartoon is signed 'figlio' in the bottom right corner.

JUDGING OF HEIFERS—Top left: Picture taken at the annual Perth, Scotland, Aberdeen-Angus bull sale shows the crowd watching the final judging of the heifers by the American judge, T. G. Tolan, from Pleasant Plains, Ill.

ONE LESS WOLF—Left: Here is one less wolf which will attack sheep and game in the Gatineau Valley north of Ottawa. Leslie Quinn and Edger Begley, Aylwin Station, bagged this 60-lb. wolf with a single shot not far from Mr. Begley's farm home.

EGG OILER—Like a miniature ferris wheel, this machine oils Grade A eggs before they are put in cold storage. Said to be the first and only egg-oiler in Montreal it is operated by the Eastern Farm Products Co., there. The oiling preserves the eggs so that they may come out of storage as Grade A eggs. The eggs, on trays, pass through a bath of light mineral oil, kept at a temperature of 80 to 100 degrees. The trays, holding three dozen dry eggs, are hung on horizontal bars, while the oiled eggs are lifted off after oiling and draining during one turn of the wheel.

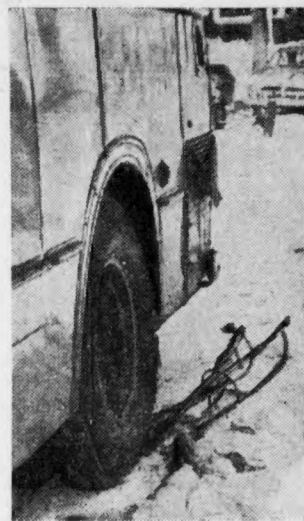

ACCOMMODATION FOR 10,000 TURKEYS—Shown above is some of the 18 turkey pens on the farm of Mr. Francois Girard of St. Hyacinthe, Que., the largest turkey raiser in the province. The 18 pens can accommodate up to 10,000 birds.

Notice is hereby given that the assessment of the previous year has been adopted under the provisions of the Assessment Act, and that the assessment roll of the said municipality has been duly prepared, and that if any person thinks that any property has been wrongfully assessed, or assessed too high, or too low, or that his name or the name of any other person has been wrongfully entered upon or omitted from the roll, he may at any time prior to the 30th day of April, 1950 notify the Secretary-Treasurer in writing of the particulars and grounds of his complaint.

Dated at Carbon, Alberta, this 22nd day of March, 1950.

S. F. TORRANCE,
Secretary-Treasurer

By DR. F. L. GREFANEY, Director.

Stop Smut — Treat Your Seed

Seed treatment of grain crops for the control of smut is a practice that is adding hundreds of thousands of dollars annually to the pockets of western farmers.

Treatment Needed. There are two important reasons why seed treatment should be widely used in Western Canada this spring. First, the surface-borne grain smuts, which can be easily controlled by seed treatment, are still very prevalent in this country and causing heavy losses annually. Second, owing to the occurrence of frost, drought, and poor harvesting conditions, much of the seed-grain that was produced in many districts of Western Canada in 1949 will germinate poorly, yes, very poorly, in 1950. Such seed needs to be protected against soil-borne organisms that cause seed decay and seedling blights. Seed treatment will perform two important functions—it will *disinfect* and *protect* the seed.

Treatment Methods. Today, the seed disinfectants (chemicals) recommended for treating wheat, oats, and barley for smut control are Ceresan M, Leytosan and Panogen. Panogen, a liquid treatment, is a promising new seed disinfectant. When used in the dust form, Ceresan M or Leytosan should be applied to wheat, oats and barley at the rate of 1/2 oz. per bushel of seed. It is best, however, to treat seed of oats and barley at least 7 days before it is sown. If seed grain is dry it may be treated 30 to 90 days before seeding, without injury to germination. Such treated seed must, however, be stored in a dry, well ventilated place. It must be remembered, of course, that the above treatments will not control loose smut of wheat and true loose smut of barley. The only satisfactory seed treatment for these smuts is the "Hot Water Treatment."

If you want further information on seed treatment see your Agricultural Representative, or write to your nearest Dominion Laboratory of Plant Pathology (Winnipeg, Saskatoon or Edmonton) or to Line Elevators Farm Service, Winnipeg.

Below is a list of farmers rinks taking part in the recent farmers bonspiel, and which was held over from last week because of lack of space:

Sid Cannings, Bruce Gilbert, Jack Brown, Ned Fuller.
Dick Garrett, Geo. Appleyard, Irvin McCracken, Dave Anderson, Leon Coates, Bud Anderson, Lindsay Hay, Fred Fuller.

Joe Appleyard, Leo Brown, Ed Cannings, Ross Fraser.

Gottlieb Schell, Frank Piersen, Ed Ohlhauser, Charley Miller.

Leo Ohlhauser, Roman Ohlhauser, J.E. Ohlhauser, Norman Ohlhauser.

Johnny Diede, Robert Marshman, Clayton Forsch, Basil O'Rourke.

Earl Morgan, Leonard Mancell, Ray Mancell, Gordon Mancell.

Vic Luft, Tom King, Gottlieb Eslinger, Otto Martin.

Bert Charlebois, Jim Bushby, Martin Hector, Royal Hay.

Hartley Hay, Jack Gordon, J. Schmidt, Emil Ohlhauser.

Emil Rempfer, Findlay Code, Paul Permann, Bacon.

Alf Holvik, Jim Barber, Pete Peterson, R. McIntosh.

Stewart Hay, Adam Buyer, Russell Snell, Les Bramley.

Dave Gieck, Fred J. Ohlhauser, Bill Betcher, Arnold Ohlhauser.

Lighting Plant Charges Battery

FARM lighting plants are rarely—unless home-built—of a correct voltage to charge ordinary storage batteries. Some means of reducing the voltage to the value required must be found.

It is easily possible to charge automobile storage batteries from the batteries of a farm lighting plant. It will be necessary to use a resistance between the source of supply of power and the battery being charged. The accompanying diagram shows a lamp bank arranged for this purpose. To make such a resistance unit it is necessary only to get some flat base porcelain sockets which can be screwed on to a board and wired in

parallel so as to regulate the current flow to the rate desired for charging batteries.

For 32-volt current it would be advisable to use 6 or 8 lamps of 40 watts each for the starting rate for the battery, and when it is nearly full and gassing freely, about half these bulbs can be unscrewed, thus cutting down the charging rate.

This method of connecting a bank of lamps in parallel will permit the direct charging of 6-volt batteries from a 32-volt lighting plant.

KITCHEN MEDITATIONS TO A BABY GIRL

By JANE DALE

Dear babe, I truly wish for you
Blest happiness, contentment too;
The sun's warm kiss, the rain's sweet
balm

True turbulence and treasured calm.

I wish that life may ever be
A real adventure, misery free;
Each day a gift from One who knows
The sacred path a maiden goes.

May mother's love and father's care
Enfold you with protection rare;
May home a haven always be.
All these, sweet babe, my hopes for
thee.

BEWARE OF COLDS

A cold passes the "common" stage if fever, body-aches or weakness are accompanying symptoms—also if coughing of mucus from the chest occurs. If these symptoms appear, call your doctor at once.

Cheaper Living Formula Sought In Laboratories

(By a Central Press Canadian
Correspondent)

Did you ever hear butter make a noise?

Well, it does just that. And, to a man with a good ear, the sound of butter may be a tell-tale indication of whether you should eat the stuff or save it for cooking.

Butter graders, a sensitive crew out to protect consumers against inferior products, use all of their five senses in measuring butter quality. If a test plug of butter lacks body, it makes a sloshing sound, ultimate evidence that it is of low grade.

Most important butter tests are those of smelling and tasting. But graders also use their touch and sight, preparatory to giving butter one of the grades of AA, A, B, C, or CG (cooking grade).

The butter grader is only one of thousands of inspectors, scientists and research workers across the country whose job it is to bring you lower-cost and higher-quality foods, clothing and shelter.

Every year about this time these men survey the progress made during the past year and take a look ahead. Here are some of the things you can expect as a result of their labors:

Dairy Products:

Agricultural scientists are taking a cue from Denmark in the campaign to eradicate undulant fever in human beings and the associated disease of cattle—brucellosis. Now under trial in U.S. agriculture department laboratories is the "ring test", developed by Danish scientists as a method of detecting brucellosis infection in dairy cattle.

The testing material is added to samples of milk taken at creameries. If there is infection in the herd from which the milk comes, a blue ring appears in the test tube at the "cream line".

Dairy scientists have turned still another trick that should please consumers.

It is the discovery of Dr. George P. Sanders and Dr. Oscar Sager of a sure-fire method for detecting whether the milk and cream in a dairy product—any dairy product—is pasteurized and safe for consumption.

The dairy detectives devised the test through discovery of the fact that there is always present in raw milk a certain enzyme called the "phosphatase". Payoff is the additional fact that the enzyme is always destroyed by heat. Hence its presence in a dairy product reveals that

Expert Examines Strawberries to Find Ways of Improving the Strain.

the milk or cream was either under-pasteurized or not pasteurized at all.

Incidentally, if you have in mind buying your own cow, the government's dairy experts have another tip; don't base your purchase on the old notion that the cow is a good milker just because she has a heavy pattern of veins on the surface of udder and abdomen.

Following tests of vein patterns and production records of 200 cattle, the experts have come up with this verdict: there is "little or no relation" between the two factors. Poor milkers may make a great showing in the vein department, and vice versa.

Fruits And Vegetables:

Sturdier, better flavored and bigger berries and fruits are in prospect through the development of new varieties that have three or more instead of the usual two sets of basic chromosomes.

Stronger and thriftier strawberries and raspberries already have been grown experimentally, as well as giant-fruited apples, pears and peaches. You can expect them to appear soon on grocery racks.

Offhand, you would suppose that storage reduces the food value of vegetables. That is what researchers in Cheyenne, Wyo., expected to find upon examining nine varieties of carrots following storage in a moist-air root cellar.

Helpful Hints

For washing lingerie, hose and handkerchiefs and other small articles, make a mesh bag with a short zipper opening or omit the zipper and simply tie the top of the bag with two or three turns of cord, then toss the whole thing into the washer. Everything "comes clean" simply and conveniently, too, for there is no searching around in the water for temporarily lost articles.

Aluminum cooking utensils are quite easy to clean, but are darkened and even pitted by strong alkaline cleaning compounds. To keep utensils in good condition, do not use them for storage foods which discolor or pit the metal.

Instead, they discovered that every variety actually built up its content of carotene, a valuable element in the diet. The findings are viewed by scientists as being of vital significance in future food improvement.

Cotton:

A new "shopper's coat", developed by Clarice Scott of the U.S. Agriculture department, is expected to be manufactured in quantity soon.

The new coat is especially designed for housewives who do the marketing on foot or by streetcar. Made of a new-type shower and wrinkle-resistant cotton, it has (1) a hood with visor that protects against sun or rain (2) special slots for shopping lists (3) sleeve pocket for paper handkerchiefs (4) automatic pull chain for house key and/or trolley tokens.

Lumber:

More and less expensive lumber for home construction should be the eventual result of research by forestry experts. They have discovered that hybrid pine trees may be grown in about half the time it takes to develop the usual varieties.

Crosses of western white pine and eastern white pine could ease the nation's chronic timber shortage. Indications are, say the scientists, that hybrids will be twice as tall and three times as heavy as either parent tree four and one-half years after planting.

At that rate, a sturdy pine fit for lumber could be produced in 40 to 50 years instead of the 80 to 100 years now required for ordinary pines to reach harvest size.

Beef:

More and bigger steaks are in sight, also as a result of cross-breeding. Crossbred beef cattle may look like scrubs, say researchers, but they are "better in nearly every respect" than the purebred stock from which they stem.

Cross-breeding tests carried out with high-quality Shorthorn, Hereford and Angus sires resulted in offspring that showed all the familiar signs of hybrid vigor.

They made economical gains in the feedlot; their carcasses graded well and slaughtered to advantage. They are gaining increasing favor with packers.

SPORT

Team Captains Select N.H.L. All-Star Team

The current issue of The Hockey News carries the N.H.L. All-Star Team as selected by the six team captains. The six skippers, Sid Abel, Detroit; Ted Kennedy, Toronto; Butch Bouchard, Canadiens; Buddy O'Connor, Rangers; Milt Schmidt, Boston and Doug Bentley, Chicago, picked two squads and points were awarded on the basis of two for a first-place vote and one for a second selection.

The First Team was as follows: Goal—Bill Durnan, Canadiens; Defense—Leo Reise, Detroit and Gus Mortson, Toronto; Center—Sid Abel, Detroit; Right Wing—Maurice Richard, Canadiens and Left Wing—Ted Lindsay, Detroit. Three places on the team fell to players on the Detroit Red Wings. Leo Reise, Sid Abel and Ted Lindsay were sure-shot All-Stars and the trio of Red Wings were all practically unanimous selections. Canadiens have two representatives on the mythical club in Bill Durnan and Maurice Richard, while Toronto was able to place a player in Gus Mortson.

The Second Team was composed of the following players: Goal—Charlie Rayner, Rangers; Defense—Kenny Reardon, Canadiens and Jack Stewart, Detroit or Bill Quackenbush, Boston; Center—Edgar Laprade, Rangers or Paul Ronty, Boston; Right Wing—Gordie Howe, Detroit and Left Wing—Roy Conacher, Chicago or Harry Watson, Toronto.

The Hockey News story divulges many other interesting findings by the six captains including Best Defense—Leo Reise and Jack Stewart, Detroit; Best Line—Ted Lindsay, Sid Abel and Gordie Howe, Detroit; Best Skater—Bill Mosienko, Chicago; Best Stickhandler—Max Bentley, Toronto and Best Referee—George Gravel.

TRY AND STOP ME!

By BENNETT CERF

Absent-minded professor story number 63,871; the math wizard who left his berth for a glass of water and couldn't remember the right number when he returned. He appealed helplessly to the porter, who asked, "haven't you any idea of what part of the car it was in?" The mathematician pondered, and suddenly piped up, "Ah, yes, I remember now that at one time this morning the window looked out on a beautiful little lake."

"Girls", sniffed Farmer Jones disdainfully, as he whittled beside the general store cracker barrel. "Girls are a dime a dozen where I come from." A red headed youngster in the corner looked up and sighed, "Gosh all hemlock, and here I've been buying only lollypops!"

HERE'S HEALTH!

Georgie's school reports were sad
He failed in all his classes,
Until the school nurse found the cause:
Georgie needed glasses.
Dept. of National Health and Welfare

While brunettes thrive best in climates where there is an abundance of sunlight, blondes tend to die out or move to more suitable climates.

Garden Notes

Sow Grass Early

One garden job that we can carry out first thing in the Spring almost regardless of weather is sowing grass seed. Of course where a new lawn is being established the ground will have to be thoroughly prepared first and this means cultivating, rolling and raking until it is as level as possible and the top soil is worked up fine and all visible weeds destroyed. It is not really safe to work soil until all the frost is gone and the ground dry enough to walk on without getting one's shoes muddy.

But if it is merely patching a lawn that has to be done, then one can sow anytime, even before the last snow goes. The important thing is to get a good grade of packaged lawn seed, which is a mixture of different grasses, blended so that there will be some quick-growing types to give some shade to the later germinating and more permanent types.

Grass loves cool weather. It must get a good start before the weather really turns warm. For obvious reasons, sow on a windless day and to make sure of an even catch the experts say it is best to broadcast once lengthwise, then across. If possible water well during dry weather and make sure the mower is razor sharp for the first few cuttings. A dull mower will pull out new grass. Like any other plant, grass will benefit from good soil and an occasional dressing of manure or the right kind of chemical fertilizer. A rich, well-fed lawn will not only be a better color and texture but it will be vigorous enough to crowd out most weeds. Where the lawn or part of it is shaded most of the day a special mixture of seed designed for such conditions should be used.

Sweet Peas Early Too

Another early bid is the sweet pea. It gives best results when planted just as soon as one can dig and prepare the necessary little trench. Often one can find a corner of the garden which dries out weeks before the rest. If it is not too shaded and gets some breeze this is just the spot for sweet peas. Dig a trench a foot or so deep. Tramp in about three inches of well-rotted materials, old leaves or manure are best, then top off with a couple of inches of the finest and richest soil available. Plant in this about an inch deep and three inches apart. Let the rains gradually fill in the rest of the trench as the plants come up. This develops the deep, strong root growth that is essential for heavy blooming and health during the Summer weather. Provide support in the form of brush or strings. Wire is not recommended as it injures the tender growth.

Pruning

Pruning can be done anytime from February to June with most shrubs, trees, etc. The general purpose is to remove dead growth, shape the bush or shrub and let in air and sunshine. Shrubs that bloom first thing in the Spring like the Forsythia, Spirea, etc., should not be pruned until after blooming so that flowering this season will not be spoiled.

GEMS OF THOUGHT

INDIVIDUAL THOUGHT

The happiness of your life depends upon the quality of your thoughts.
—Marcus Aurelius.

Silence and reserve suggests latent power. What some men think has more effect than what others say.
—Chesterfield.

Quiet minds can not be perplexed or frightened, but go on in fortune or misfortune at their own private pace, like a clock during a thunderstorm.—Stevenson.

The man who has begun to live more seriously within, begins to live more simply without.—Phillips Brooks.

A vivid thought brings the power to paint it; and in proportion to the depth of its source is the force of its projection.—Emerson.

Hold thought steadfastly to the enduring, the good, and the true, and you will bring these into your experience proportionably to their occupancy of your thoughts.—Mary Baker Eddy.

Smile of the Week--

STUMPED

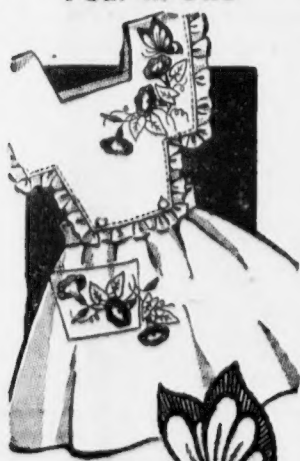

Fed up with tipping most of the hotel staff for trifling services, the guest determined to call a halt. There came a knock at his door.

"Who is it?" he asked.
"The page, sir, with a telegram."
"Very well," said the determined one, "Just slip it under the door."

After a moment an equally obstinate reply came back. "I can't sir. It's on a tray."

OUR COMPLETE SHORT STORY—

The Telegram

The Exquisite Agony Of
Relief Was Almost Too
Great To Bear.

By Charlotte McCarthy

OPENING the telegram, Iris smiled fondly. What could John possibly have to tell her that wouldn't keep until tomorrow night? That he loved her and longed for the moment . . . ?

Then, as she read the few typed lines, her face turned an ashy white. Fighting for self-control, she deliberately read it aloud, slowly, every word.

"The paper crackled in her fingers. A log in the fireplace in the living room had crackled like that the night that John had asked her to marry him.

Was it really true, and not part of a hideous nightmare?

The words blurred, then stood out in clear relief: "Helen and I were married today. Will call off plans on the house, for the time being. I'll see you tomorrow night. John."

How dare he do this to her! And cruelly mentioning the home they were building. How unbelievably un-

like John! Or was this the real John? Was the person she loved the man she had believed him to be?

They said you could do that . . . the clever psychologist. Build a person up in your mind, your heart a mirror to reflect the perfect image.

Her engagement ring felt heavy and cold. A steely, chill circle on her finger. She laid the telegram on the table, carefully, as if it were something extremely precious that might shatter to fragments, and slipped the ring off her finger.

John was married. Helen, whom she had believed to be her friend, had married John, knowing that he was engaged to her; knowing that their house was almost built. It occurred to her now that Helen had been acting rather strangely this past week, but since Helen rarely confided in anyone, she hadn't given the matter too much thought! Even when John had mentioned giving Helen a lift into the city with him, since she planned on going the same day.

She wouldn't tell her father for awhile . . . better wait until tomorrow, when she might feel stronger to bear the added weight of his sorrow for her. Would John face her alone, or perhaps, and the thought was infinitely painful, would Helen come with him?

This couldn't be happening! Her wedding dress hung in the closet, its shimmering veil a gleaming thing of beauty. All the linen, carefully folded in her cedar chest. What did people do, when they found they didn't have the strength to go on living?

Somehow she got through the day, through the night, and when the chill grey of dawn was in the room, her mind became a merciful blank, and she slept. How often she had been amused by heroines in novels, who explained their pallor by pretending a headache. And yet the excuse was good.

She was standing beside an open window that night, the crumpled telegram in the pocket of her dress. A soft, spring breeze, perfumed with the promise of blossoms, brushed crystal fingers across her face. There was a car stopping in front of the house . . . a familiar car.

John was alone, and he got out and hurried up the walk. Her father opened the door. Why hadn't she told dad, she wondered desperately, when she heard the casual warmth of his greeting?

He saw her then: "Iris, you're as white as a ghost!"

What did he expect, she wondered wryly. "Your wire came," she said woodenly, handing him the yellow sheet of paper. "I didn't show it to dad. Perhaps you'd like to read this to him."

His expression inscrutable, he took the telegram. "Why, darling, there's been a mistake! I phoned in the wire, and it should have read 'Helen and Si.' You know Si, the chap who's building our house? But Iris, surely you knew . . . !"

The exquisite agony of the relief that sang through her veins was almost too great to bear.

"I should have known, John," she said, humbly, gratefully.

Pioneer Passes

BALDUR, Man.—Alexander Fowler, pioneer Manitoba postmaster and a life member of the Manitoba Curling association, died at his home. He was 82 years of age. Mr. Fowler, a resident of Baldur since 1891, was active in all community and educational projects of the district.

Receives Merit Certificate

PRECEVILLE, Sask.—W. M. Sulatski's perfect grain elevator record for 10 consecutive years has won him the elevator master merit certificate from the Grain Insurance and guarantee Co., in recognition of outstanding proficiency in the maintenance of grain elevator premises. Mr. Sulatski is employed by the Searle Grain Co. Ltd.

To Build Temple

WINNIPEG.—Winnipeg's first Buddhist temple will be built this spring. To serve about 150 Japanese families, it will be constructed by the Manitoba Buddhist Association which until now has rented public halls for services.

Must Build Line

EDMONTON.—An order to Calgary Power Co. Ltd. to construct a transmission line, estimated to cost \$1,300,000, to provide service for the Crownsnest area will remain in effect, the Board of Public Utilities Commissioners announced.

No Exploration

REGINA.—The Saskatchewan government is doing no exploration work of its own for oil and gas, according to an answer in the legislature by Resources Minister J. H. Brockelbank to a question from A. A. Lipton (L—Saltcoats). Future policy in the matter will be announced in due course.

400 Horses A Week

REGINA.—The horse meat processing plants at Swift Current and Edmonton are slaughtering about 400 horses a week, it was revealed at the annual district meeting of the Canadian Co-operative Processors Ltd., held here.

Wins Ring Trophy

EDMONTON.—The University of Alberta has won the Nielson trophy, awarded for western inter-collegiate boxing and wrestling supremacy. In the annual assault-at-arms held recently, Alberta won four of six events in both boxing and wrestling from the University of Saskatchewan.

ALBERTA TO
INCREASE OLD
AGE PENSION

EDMONTON.—Alberta's old age pension will be increased to a maximum of \$50 a month, an increase of \$2.50, if a proposal contained in Premier Manning's budget speech receives the assent of the legislature. The present pension is \$47.50 per month.

Mr. Manning said the budget provided for the increase which will bring the province's supplementary allowance to \$10 a month. This allowance is not subject to the means test or to any special residence qualifications.

The increase maintains Alberta's position in affording one of the highest old-age pensions in Canada.

Spring Floods
Not Expected
In Manitoba

WINNIPEG.—Manitoba this spring should be free from serious floods comparable to those of 1948, providing precipitation through March and April is normal and average break-up conditions prevail.

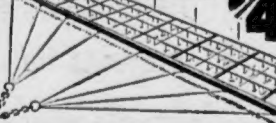

This prediction, based on conditions existing as at March 1, 1950, comes from the water resources division of the development services branch of the dominion department of resources and development.

The analysis emphasizes that any variations, either favorable or unfavorable, from normal break-up conditions could change the forecast materially.

FOOD DROPPED
TO RARE SWANS

VANCOUVER.—Life-giving barley was dropped from the air recently for a flock of 100 rare trumpeter swans wintering at ice-coated Lonesome lake, 350 miles northeast of here.

An R.C.A.F. Dakota parachuted 1,000 pounds of the grain to the birds, facing starvation as a result of the unusually severe winter.

Cut Harrowing
Time 1/4with the NOBLE ALL STEEL
SECTIONAL HARROW
EVENER DRAW BAR

Models for 4 to 12 diamond harrow sections and 2 to 8 flexible sections.

WAKE UP YOUR
LIVER BILE—

Without Calomel—And You'll Jump Out of
Bed in the Morning Rarin' to Go

The liver should pour out about 2 pints of bile juice into your digestive tract every day. If this bile is not flowing freely, your food may not digest. It may just decay in the digestive tract. Then gas builds up your stomach. You get constipated. You feel sour, sunk and the world looks punk.

It takes those mild, gentle Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Effective in making bile flow freely. Ask for Carter's Little Liver Pills, 35¢ at any drugstore.

Luscious HONEY BUN RING

Quick to make
with the new
Fast DRY Yeast

• Hot goodies come puffin' from your oven in quick time with new Fleischmann's Fast DRY Yeast! No more spoiled cakes of yeast! No more last-minute trips—this new form of Fleischmann's Yeast keeps in your cupboard! Order a month's supply.

HONEY-BUN RING

• Scald 3/4 c. milk, 1/2 c. granulated sugar, 1 1/2 tsps. salt and 1/4 c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl 1/2 c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 mins., THEN stir well.

Add cooled milk mixture and stir in 1 well-beaten egg and 1 tsp. grated lemon rind. Stir in 2 c. once-sifted bread flour; beat until smooth. Work in 2 c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of

dough. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough and roll out into an oblong about 9" wide and 24" long; loosen dough. Combine 1/2 c. lightly-packed brown sugar and 1/2 c. liquid honey; spread over dough and sprinkle with 1/4 c. broken walnuts. Beginning at a long side, loosely roll up like a jelly roll. Lift carefully into a greased 8 1/2" tube pan and join ends of dough to form a ring. Brush top with melted butter. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, 45-50 minutes. Brush top with honey and sprinkle with chopped walnuts.

THE TILLERS

—By Les Carroll

The Junior Ladies' Aid of Carbon United Church will hold its Annual Bazaar, Sale of Home Cooking and an Easter Tea on Saturday, April 1, at 3 p.m. in the Scout Hall.

The Royalite Oil Company Wednesday of last week abandoned its wildcat well, Ghost Pine-Royalite, northeast of Carbon. Decision to cease drilling was made after the well was drilled to a depth of 6,191 feet.

FOUND—String of Pearls in front of Drug Store; Earring on sidewalk between Drug Store and Scout Hall. Owners may have same by applying at Shaw's Drug Store, identifying, and paying for this ad.

LITTLE NEWS ITEMS OF LOCAL INTEREST

The March meeting of the Carbon branch of the Canadian Legion has been postponed for one week, and will now be held Monday evening, March 27.

Miss Esme Postlethwaite of Maclin, Sask., and Jim Postlethwaite of High Prairie, Alberta, are visiting in Carbon at the home of their sister, Mrs. J. Buchner.

Bob Garrett and Dale Poxon of Calgary spent the weekend at their respective homes in Carbon.

Rev. Jacob G. Rott will conduct morning services at the Carbon Baptist Church and evening services at Zion Baptist Church on Sunday, March 26.

Mr. and Mrs. Frank Emery of Acme spent the weekend in Carbon at the home of Mr. and Mrs. Wilf Skerry. They were accompanied on their return by Mrs. H. Skerry, who has been spending the past five weeks in Carbon at the home of her son.

Mr. and Mrs. A. Hay Observe 50th Anniversary

The Carbon Scout Hall was the scene of a memorable celebration Monday evening when a large number of friends and relatives met to honor Mr. and Mrs. Alexander Hay on the occasion of their 50th wedding anniversary. The hall was appropriately decorated for the occasion, with gold the predominating color.

Mr. and Mrs. Hay welcomed the guests as they entered the hall and led the grand march which opened the festivities. The guests enjoyed modern and old time dancing to the music of Ma Trainor's orchestra. Mrs. Trainor also played for Mr. and Mrs. Hay's 25th wedding anniversary. A vocal duet was rendered by Shirley and Jackie Hay and solos sung by Mrs. R. Shaw, Mr. Frank Smienk and Mr. G. Trepanier. A very delicious lunch was served at midnight.

Mr. Len Poxon proposed the toast to the honored couple, stressing their sterling character and the fine example they had set for the younger generation in their long and happy married life. Telegrams from friends unable to attend were also read. Clarence Hay, son of the honored couple, responded to the toast with several amusing anecdotes on the life of his parents in pioneer days.

Anniversary gifts of a fan back chair in brocaded silk and a La-Z-Boy chair and stool in gold mohair were then presented to Mr. and Mrs. Hay, who were escorted to their seats of honor by Mr. A. McLeod and Mrs. L. Poxon. Little Janie Campbell then presented Mrs. Hay with a bouquet of red roses. On behalf of his wife and himself Mr. Hay thanked all present for the beautiful gifts, and together they cut the three-tiered anniversary cake. Donald Gordon sang a solo and Mr. W. D. MacDonald of Grainger also paid tribute to the couple in a few well-chosen words. Further dancing brought a very enjoyable evening to a close.

CARD OF THANKS

We wish to extend our sincere thanks to our very many friends and relatives for their kind sympathy, cards and floral offerings sent during our recent sad bereavement. A very special thanks to the Hugh Browns of Edmonton for their kindness and hospitality

Charlie, Violet and Don Pattison

Community Meeting

the type of hall chosen and advantages and disadvantages of the suggested location of the structure pointed out. The ensuing ballot resulted in a majority vote in favor of the building being erected on property owned by Stewart Hay on the north edge of town. The curling rink project was referred to the curling club for a decision as to whether a 3-sheet or 4-sheet building was needed. The skating rink, involving the smallest cash outlay, will be completed first.

Following the public meeting the Community Council met to discuss the canvass of the district. It was decided to appoint five district captains to conduct a promissory canvass of the community to determine how much money could be raised toward the project. The canvass will be

conducted during the next two weeks and on completion a report will be made to the council. Watch for further details in The Chronicle.

THE NEW 1950 PONTIAC offers more than a score of appearance and mechanical changes and is available in 21 models beginning in the lowest price range, according to a General Motors announcement. New massiveness in frontal design is achieved with main grille bars reaching out and around the fenders. The new Pontiac offers a choice of six and eight cylinder engines, the latter stepped up to 108 horsepower. Other mechanical features include a new and larger radiator core for the six cylinder engine and rubber rear spring bushings to eliminate road shock and power transmission noises. Hydraulic drive is again available as an option at extra cost on certain Pontiac models. Shown here is the Chieftain four-door Sedan.
